Allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art fails to describe a method for serializing a bulk virtual connection request, comprising the specific steps of:

determining whether the difference between the last virtual circuit identifier and the current virtual circuit parameter is greater than the delta threshold; wherein serializing comprises determining which one of the following condition (1) - (5) is applicable if the difference between the last virtual circuit identifier and the current virtual circuit parameter is not greater than the delta threshold:

(1) the status parameter has a SUCCESS value and the difference between the last virtual circuit identifier and the current virtual circuit parameter is less than the delta threshold;

(2) the status parameter has a FAIL value;

(3) the status parameter has a SUCCESS value and the difference between the last virtual circuit identifier and the current virtual circuit parameter is greater than the delta threshold;

(4) the status parameter has a IN_PROCESS value and the difference between the current time and the start time is less than the time threshold;

(5) the status parameter has a IN_PROCESS value and the difference between the current time and the start time is greater than the time threshold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
